

# DISCIPLESHIP PART 2

---

Jesus' last words were to go out and make disciples - all of us, not just church leaders. A study found that people who started coming to church did so 86% of the time because a friend asked them, and only 2% because a church leader did. Our discipleship means going out into the community, not waiting for people to come to us. It means going toward people just like God did by sending Jesus, His son.

In reality we can't speak to everyone and it can feel daunting, especially if we're not naturally evangelists. We can't do it on our own: we need God and each other. The Great Commission is made to be shared - we can't change the world all in one go. But we can change the places that we live. The encouragement, and the challenge, is to follow Jesus as a disciple, making other disciples, not just being a church-going person.

## 01 — How did it all start?

No one is born a Christian, everyone is brought to church by someone. What's your story? How did you get introduced to church?

## 02 — Counter-cultural discipleship

Jesus sent us out to our communities to preach the gospel and make disciples. What does Jesus do with his disciples that we should consider doing with others?

## 03 — Stepping out in faith

Being an evangelist does not come naturally to all of us. What are some ways we can live our lives as witnesses to our faith, without words?

## 04 — Practising what (Cathy) preaches

How will Cathy's words and our discussion change your week?
